

Components references, not related to manufacturers ones.
 Not inspected "classic" components/ wiring (power supply/ standard datasheet schematics etc).
Modified schematics according to midelic's FW:
port layout for FW with automatic driver detection
***** WITHOUT *** U2/ 74LVC1G126 driver removed.**

Add new resistor
 on R14, size 0402
 Range will be 8.4 or 8.5V.
